LOCATION MAP

DESCRIPTION

- Landscape Type
  Naturalistic, Ecological

- Facilities
  Footpaths, Seating, Waterfeature, Signboard

- Effectiveness
  High accessibility, High usage, Medium Contribution to City Form, Used primarily by women and children

- Safety
  Railings at the water but otherwise not enclosed, it is overlooked

QUALITATIVE ANALYSIS

- High visual amenity with moderate maturity, it is an ecological area within a residential development. Water attractions include a pool and a stream. It is well maintained, highly used, and has well defined boundaries. This is a good example of a residential development creating open space and maximising natural features.

POTENTIAL AND OPPORTUNITY

- Potential to link in with footpaths to regional river corridor and form part of open space network.

- Local open space; safeguard and manage.
